### **DETAILED ACTION**

1. This communication is in response to Applicants' Request for Continued Examination incorporating the claim amendments and arguments in the Response To Final Office Action (the "Amendment") mailed on 29 November 2004. In the Amendment, claims 39, 50, and 61-62 were amended; claims 40 and 51 were canceled. Claims 39, 41-50, and 52-62 are pending

#### ***Claim Objections***

2. The following is a quotation of 37 CFR § 1.75:

(a) The specification must conclude with a claim particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention or discovery.

2.1 Claims 41-44 and 52-56 are objected to under 37 CFR § 1.75(a) because each of these claims is dependent on a claim that was canceled in the Amendment. Correction is required.

#### ***Claim Rejections - Non-Statutory Double Patenting***

3. The non-statutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 2123

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 39, 41-50, and 52-62 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 6 of U.S. Patent 5,708,798. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time of Applicants' invention to permit a resource offered by one of the elements in the structural model to represent a pool of resources, because the resulting model would more accurately reflect actual resources, such as power supplies, that can be pooled.
